Document Control

Field	Details
Document Title	SDT - Use Case Specification
Project	Self Development Tracker (SDT)
Version	1.0
Application Version	SDT V1 - Local Application
Date	27 August 2026
Status	Final
Related Artifacts	Business Requirements Document (BRD) v1.0; Functional Requirements Specification (FRS) v1.0; SDT Use Case Diagram
Purpose	Describe the principal user-system interactions for SDT V1 and provide traceable scenarios for implementation and validation.

1. Purpose

This document provides detailed use case specifications for the principal user workflows represented in the SDT V1 Use Case Diagram. It complements the BRD and FRS by describing how the User interacts with the SDT System to achieve specific goals, including the normal sequence of events, alternative paths, preconditions and resulting system state.

The specification intentionally focuses on the major end-to-end user goals rather than documenting every supporting oval in the diagram as a separate use case. Supporting behaviours such as validation, saving, configuration locking and report generation are incorporated into the relevant primary workflows.

2. Scope and Actor

Item	Definition
Primary Actor	User - the individual configuring, running, monitoring and completing a self-development challenge.
System	SDT (Self Development Tracker) V1 local web application.
Scope	Challenge setup, daily tracking, progress monitoring, challenge completion and report viewing/printing.
Actor Representation	The Use Case Diagram shows the same User actor on both sides for readability. Both figures represent the same actor and do not indicate different roles.

3. Use Case Diagram

Figure 1. SDT V1 Use Case Diagram

4. Use Case Catalogue

UC ID	Primary Use Case	Diagram Coverage
UC-01	Create and Start Challenge	1.1 Create New Challenge; 1.2 Configure Rules / Tasks; 1.3 Set Strikes Allowed; 1.4 Set Challenge Duration; 1.5 Start Challenge; 1.6 Lock Challenge Configuration
UC-02	Record Daily Progress	2.1 View Today (Quick Access); 2.2 Record Daily Progress; 2.5 Validate Daily Checklist; 2.6 Save Daily Record
UC-03	Edit / Review Daily Records	2.3 Edit Today's Record; 2.4 View Past Records; supporting validation/save behaviour where a record is changed
UC-04	Monitor Challenge Progress	3.1 View Dashboard; 3.2 View Calendar; 3.4 View Rule-level Performance & Strikes
UC-05	Generate and View Progress Report	3.3 Generate Progress Report (In-Progress); 5.1 View/Print Report
UC-06	End Challenge Manually	4.1 End Challenge Manually; 4.2 Confirm End Challenge; 4.3 Generate Final Report
UC-07	View / Print Final Report	4.3 Generate Final Report; 5.1 View/Print Report

5. UC-01 - Create and Start Challenge

Field	Specification
Use Case ID	UC-01
Primary Actor	User
Goal	Create a new challenge with a defined duration, strike allowance and fixed set of rules/tasks, then start it.
Trigger	No active challenge exists and the User opens SDT.
Preconditions	SDT is running and can access its configured database. No challenge is currently active.
Included / Supporting Use Cases	1.2 Configure Rules / Tasks; 1.3 Set Strikes Allowed; 1.4 Set Challenge Duration; 1.6 Lock Challenge Configuration.
Priority	High

Main Success Scenario

Step	Actor / System Action
1	The system displays the Build Your Challenge setup screen.
2	The User enters a challenge name and selects a start date.
3	The User sets the challenge duration.
4	The User sets the strikes allowed per rule.
5	The User adds the rules/tasks that will form the daily checklist and may remove or reorder them before starting.
6	The User selects Start Challenge.
7	The system validates the challenge configuration and confirms that at least one non-empty rule/task exists.
8	The system saves the challenge and its configured rules/tasks to the database.
9	The system locks the challenge configuration so the rule/task baseline cannot be changed during the active challenge.
10	The system opens the active challenge dashboard.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	If required setup information is missing or invalid, the system does not create the challenge and displays a validation message.
A2	If no valid rule/task exists, the system prevents the challenge from starting.
E1	If persistence fails, the system communicates the failure and does not present the challenge as successfully started.

Postconditions

- A single challenge becomes active.
- The challenge configuration and rule/task baseline are persisted.
- The active challenge dashboard is available.

Requirements Traceability

BR-01, BR-02, BR-03; FR-01 to FR-12.

6. UC-02 - Record Daily Progress

Field	Specification
Use Case ID	UC-02
Primary Actor	User
Goal	Record completion of the challenge rules/tasks for a valid challenge day.
Trigger	The User selects a valid date from the calendar or uses View Today (Quick Access).
Preconditions	An active challenge exists. The selected date is within the challenge period.
Included / Supporting Use Cases	2.5 Validate Daily Checklist; 2.6 Save Daily Record.
Priority	High

Main Success Scenario

Step	Actor / System Action
1	The User selects a valid challenge date or selects Today.
2	The system opens the Day Details dialog for the selected date and displays the corresponding Day X/Y value.
3	The system displays every configured rule/task as a checkbox and loads any existing saved states.
4	The User ticks rules/tasks completed or followed and leaves unticked those not completed/followed.
5	The User selects Save.
6	The system validates the checklist context and selected challenge date.
7	The system saves the complete checklist state for that date.
8	The system recalculates daily completion, overall progress and per-rule strike information.
9	The system refreshes the dashboard/calendar and automatically closes the Day Details dialog.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	If the selected date already has a record, the existing states are loaded and saving updates that record.
A2	If Today is outside the challenge period, the system prevents progress entry.
E1	If saving fails, the system communicates the failure and keeps the dialog available rather than showing a false success.

Postconditions

- The selected day is recorded or updated.
- Progress and strike calculations reflect the saved checklist.
- Unrecorded days remain distinct from recorded incomplete days.

Requirements Traceability

BR-04, BR-06, BR-07, BR-09, BR-15; FR-27 to FR-45.

7. UC-03 - Edit / Review Daily Records

Field	Specification
Use Case ID	UC-03
Primary Actor	User
Goal	Review an existing challenge-day record and, where permitted, correct its checklist states.
Trigger	The User selects today or a previously recorded valid challenge date.
Preconditions	An active challenge exists and the selected date is within the challenge period.
Diagram Coverage	2.3 Edit Today's Record; 2.4 View Past Records.
Priority	Medium

Main Success Scenario

Step	Actor / System Action
1	The User selects a valid date from the calendar.
2	The system opens Day Details and loads the saved checklist states for that date, if a record exists.
3	The User reviews the recorded rule/task states.
4	If a correction is required, the User ticks or unticks the relevant rules/tasks.
5	The User selects Save.
6	The system updates the record and recalculates affected progress and strike metrics.
7	The system refreshes the dashboard and closes the dialog.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	The User may close the dialog without saving; the existing stored record remains unchanged.
A2	If the day has no stored record, the checklist opens as an unrecorded day rather than being treated as failed.
E1	If the update fails, the original stored state is not presented as successfully changed.

Postconditions

- Any saved correction is persisted.
- Dependent progress and strike metrics are recalculated.

Requirements Traceability

BR-04, BR-09; FR-29 to FR-35, FR-40 to FR-45.

8. UC-04 - Monitor Challenge Progress

Field	Specification
Use Case ID	UC-04
Primary Actor	User
Goal	Understand current challenge status through the dashboard, calendar and per-rule strike/performance information.
Trigger	The User opens SDT while a challenge is active or returns to the dashboard.
Preconditions	An active challenge exists.
Diagram Coverage	3.1 View Dashboard (Overview); 3.2 View Calendar; 3.4 View Rule-level Performance & Strikes.
Priority	High

Main Success Scenario

Step	Actor / System Action
1	The system loads the active challenge.
2	The system displays challenge name, date range, duration, rule count and strike allowance.
3	The system displays overall challenge progress.
4	The system renders the calendar and visually disables dates outside the challenge period.
5	The system displays challenge-day numbering and recorded completion information for valid dates.
6	The system displays rule-level strike usage/remaining information.
7	The User may navigate between calendar months to review the challenge period.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	If no active challenge exists, the system displays challenge setup instead of the active dashboard.
A2	Dates outside the challenge period remain non-interactive for daily recording.

Postconditions

- The User can assess current challenge status without changing stored records.

Requirements Traceability

BR-05, BR-06, BR-07, BR-08; FR-13 to FR-26, FR-43 to FR-48.

9. UC-05 - Generate and View Progress Report

Field	Specification
Use Case ID	UC-05
Primary Actor	User
Goal	Review a structured in-progress report of challenge performance and optionally print/save it.
Trigger	The User selects Progress Report from the active dashboard.
Preconditions	An active challenge exists.
Extended / Optional Use Case	5.1 View/Print Report.
Priority	High

Main Success Scenario

Step	Actor / System Action
1	The User selects Progress Report.
2	The system retrieves the active challenge configuration and recorded daily data.
3	The system calculates the current challenge position and report metrics.
4	The system generates and displays the in-progress report.
5	The report shows summary metrics including recorded/perfect/unrecorded days, task completion and strikes where applicable.
6	The report shows rule-level performance information.
7	The User reviews the report.
8	Optionally, the User uses the report print function to print or save the report through the browser.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	If insufficient recorded data exists for a comparative metric, the report displays an appropriate not-enough-data state rather than inventing a result.
A2	Unrecorded days are reported separately and are not automatically counted as failed rules.
E1	If report data cannot be loaded, the system communicates the error.

Postconditions

- No challenge data is modified by viewing the report.
- A printable in-progress representation is available to the User.

Requirements Traceability

BR-10; FR-49 to FR-55.

10. UC-06 - End Challenge Manually

Field	Specification
Use Case ID	UC-06
Primary Actor	User
Goal	End an active challenge before natural completion while preserving its history and producing a final report.
Trigger	The User selects End Challenge.
Preconditions	An active challenge exists.
Included / Supporting Use Cases	4.2 Confirm End Challenge; 4.3 Generate Final Report.
Priority	High

Main Success Scenario

Step	Actor / System Action
1	The User selects End Challenge from the dashboard.
2	The system displays a confirmation dialog explaining the effect of ending the challenge.
3	The User confirms the action.
4	The system marks the challenge as ended/completed without deleting its configuration or recorded progress.
5	The system preserves challenge rules/tasks and daily records.
6	The system calculates the final results using the available challenge data.
7	The system generates the final report for the ended challenge.
8	The system displays the final report.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	If the User cancels the confirmation, the dialog closes and the challenge remains active and unchanged.
E1	If the end operation fails, the system communicates the error and does not falsely present the challenge as ended.

Postconditions

- The challenge is no longer active after successful confirmation.
- Historical data is preserved.
- A final report is generated for the ended challenge.

Requirements Traceability

BR-11, BR-12, BR-13; FR-56 to FR-61, FR-64 to FR-67.

11. UC-07 - View / Print Final Report

Field	Specification
Use Case ID	UC-07
Primary Actor	User
Goal	Review the final outcome of a naturally completed or manually ended challenge and optionally print/save the report.
Trigger	A final report is generated after challenge completion/termination or the User opens the available final report.
Preconditions	The relevant challenge has reached a completed/ended state and its stored data is available.
Extended / Optional Use Case	5.1 View/Print Report.
Priority	High

Main Success Scenario

Step	Actor / System Action
1	The system retrieves the completed/ended challenge and its stored performance data.
2	The system calculates final challenge metrics.
3	The system displays the final report.
4	The User reviews overall completion, recorded/unrecorded performance, rule-level results and strike information.
5	Optionally, the User selects the report print function.
6	The browser print interface allows the User to print or save the final report as PDF.

Alternative / Exception Flows

Ref	Alternative / Exception
A1	The report supports both natural completion and manual early termination using the available stored data.
E1	If the completed challenge data cannot be loaded, the system communicates the error rather than showing incomplete results as valid.

Postconditions

- The completed challenge history remains preserved.
- The User has a final, printable summary of challenge performance.

Requirements Traceability

BR-11, BR-13; FR-62 to FR-68.

12. Cross-Use-Case Business Rules

Rule	Application Across Use Cases
Single active challenge	Only one challenge is treated as active at a time. A new active challenge is created through UC-01 after the prior active challenge has ended/completed.
Locked rule baseline	Rules/tasks are configurable before Start Challenge and treated as fixed after the challenge becomes active.
Valid tracking period	Daily progress can only be recorded for dates within the challenge start/end period.
Unrecorded day treatment	A day with no submitted checklist remains unrecorded and does not automatically consume strikes.
Strike behaviour	Missed rules on recorded days affect per-rule strike counts. Reaching or exceeding the allowance does not restart, terminate or punish the challenge.
Data preservation	Manual ending and natural completion preserve the challenge configuration and recorded history for reporting.

13. Use Case to Functional Requirement Traceability

Use Case	Primary FR Coverage
UC-01 Create and Start Challenge	FR-01 to FR-12
UC-02 Record Daily Progress	FR-27 to FR-45
UC-03 Edit / Review Daily Records	FR-29 to FR-35; FR-40 to FR-45
UC-04 Monitor Challenge Progress	FR-13 to FR-26; FR-43 to FR-48
UC-05 Generate and View Progress Report	FR-49 to FR-55
UC-06 End Challenge Manually	FR-56 to FR-61; FR-64 to FR-67
UC-07 View / Print Final Report	FR-62 to FR-68
